

RGB Controller with RF Remote

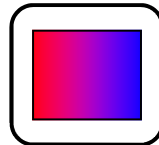

VM151

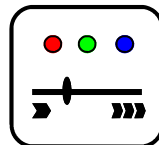

Suited for both incandescent bulbs and LEDs

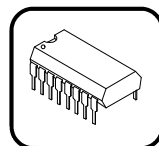

Hard transition effects
Running light, Colour loop, etc...

Smooth fade effects
Colour change, flame effect, random colours etc...

Wide-range effect speed adjust

Memory for last selected effect & speed
5 user-editable colour tables

Hi power MOSFET outputs

3 x 3A

Ideal for use with common anode led strips
e.g. LDB1-HS3027AC

Addressable. Control up to 7 units independently

Optional extra transmitter: VM130T

Technical:
 LED PWM freq: +/- 300Hz
 12V/3A outputs
 256 intensity levels/ch.
 TX/RX: 433MHz operation
 Power supply: 12V / 9A max.
 Dimensions: approx 80x70x23mm
