IRF630, IRF630S

### **FEATURES**

### • 'Trench' technology

- Low on-state resistance
- Fast switching
- Low thermal resistance

#### **SYMBOL**

#### **QUICK REFERENCE DATA**

$$V_{DSS}$$
 = 200 V 
$$I_{D}$$
 = 9 A 
$$R_{DS(ON)} \leq 400 \text{ m}\Omega$$

### **GENERAL DESCRIPTION**

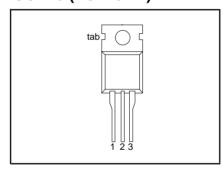

N-channel, enhancement mode field-effect power transistor using **Trench** technology, intended for use in off-line switched mode power supplies, T.V. and computer monitor power supplies, d.c. to d.c. converters, motor control circuits and general purpose switching applications.

The IRF630 is supplied in the SOT78 (TO220AB) conventional leaded package The IRF630S is supplied in the SOT404 (D<sup>2</sup>PAK) surface mounting package

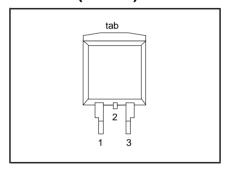

### **PINNING**

### **MECHANICAL DATA**

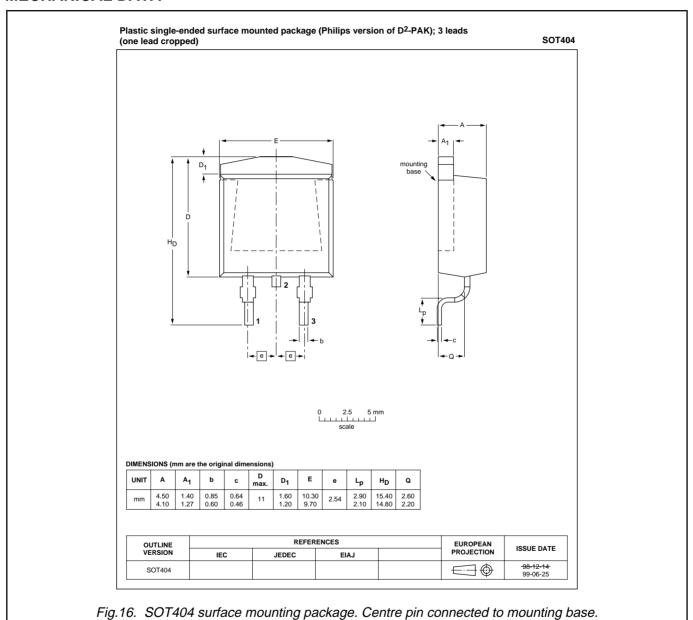

#### **Notes**

- 1. This product is supplied in anti-static packaging. The gate-source input must be protected against static discharge during transport or handling.
- 2. Refer to mounting instructions for SOT78 (TO220AB) package.
- 3. Epoxy meets UL94 V0 at 1/8".

### **DEFINITIONS**

Data sheet status				
Objective specification	This data sheet contains target or goal specifications for product development.			
Preliminary specification This data sheet contains preliminary data; supplementary data may be published late				
Product specification This data sheet contains final product specifications.				
Limiting values				

Limiting values are given in accordance with the Absolute Maximum Rating System (IEC 134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of this specification is not implied. Exposure to limiting values for extended periods may affect device reliability.

#### **Application information**

Where application information is given, it is advisory and does not form part of the specification.
