## Hamlin Reed-Switch <br> MDCG-4 Sub-miniature

Hamlin manufacture an extensive range of Reed switches with differing mechanical and electrical characteristics, designed to meet the needs of a broad range of applications.

Since manufacturing our first reed switches in 1957 Hamlin has been the world leader in reed switch technology. Today Hamlin switches are manufactured at our automated manufacturing facility in Lake Mills Wisconsin, USA, under Class 10,000 clean room conditions. Hamlin use vacuum deposition technology to control the application of contact materials at the molecular level. The use of automated vision systems and test equipment integrated in to the manufacturing process help to ensure that Hamlin manufacture reed switches of the highest quality

Available also in surface mount version. Ideally suited to reed relays, security, metering, limit sensing, telecoms and office equipment applications

| Parameter | conditions |  | unit |
| :--- | :--- | :---: | :--- |
| Switch |  | Normally open |  |
| Contact rating | Max. | 10 | Watt |
| Switching Voltage | Max. | 200 | Vdc |
| Breakdown Voltage | Max. | 250 | Vdc |
| Switching Current | Max. | 500 | mA |
| Carry Current | Max. | 1200 | mA |
| Contact, Initial Resistance | Max. | 0.100 | Ohm |
| Insulation Resistance | Max. | $10^{10}$ | Ohm |
| Operating Temperature |  | $-40 \ldots .125$ | ${ }^{\circ} \mathrm{C}$ |
| Storage Temperature |  | $-65 \ldots 125$ | ${ }^{\circ} \mathrm{C}$ |
| Operating Time | Max. | 0.6 | ms |
| Release Time | Max. | 0.2 | ms |
| Shock | $11 \mathrm{~ms} 1 / 2$ sin | 100 | g |
| Vibration | $50 \ldots 2000 \mathrm{~Hz}$ | 30 | g |
| Powering |  | Not necessary |  |
| Resonant-Frequency | Typ | 3900 | Hz |
| Pull-in Range (smaler ranges | Max. | $12 \ldots .38$ | $(\mathrm{AT})$ |
| are available as standard) |  | On request |  |
|  |  |  |  |
