# **WIMA MP 3-X2**

## Metallized Paper (MP) RFI-Capacitors Class X2 PCM 10 mm to 27.5 mm

## **Special Features**

- Particularly high reliability against active and passive flammability
- Excellent self-healing as well as high voltage strength
   High degree of interference
- suppression due to good attenuation and low ESR
- For temperatures up to +110° C
   According to RoHS 2002/95/EC

## **Typical Applications**

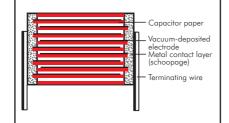

Class X2 RFI applications to meet EMC regulations

- Capacitors connected to the mains between phase and neutral or phase and phase conductors
- Installation category II in accordance with IEC 60664, pulse peak voltage ≤ 2.5 kV

## Construction

### **Dielectric:**

Paper, epoxy resin impregnated Capacitor electrodes: Vacuum-deposited Internal construction:

### **Encapsulation:**

Self-extinguishing epoxy resin, UL 94 V-0, metal foil

**Terminations:** 

### Tinned wire.

Marking:

Marking: Black on Silver.

## **Electrical Data**

## Capacitance range:

1000 pF to 1.0 µF (E12-values on request) Rated voltages:

250 VAC, 275 VAC Capacitance tolerances: ±20%

Operating temperature range:  $-40^{\circ}$  C to  $+110^{\circ}$  C Climatic test category:

40/110/56/C in accordance with IEC **Insulation resistance** at +20° C:

 $C \le 0.33 \ \mu F_{:} \ge 12 \times 10^3 M\Omega$ 

 $C > 0.33 \ \mu\text{F}$ :  $\geq 4000 \ \text{sec} \ (M\Omega \times \mu\text{F})$ Measuring voltage: 100 V/1 min.

## **Dissipation factors:**

tan  $\delta \le 13 \times 10^{-3}$  at 1 kHz and +20° C Test specifications:

In accordance with DIN EN 132400

## Approvals:

## Maximum pulse rise time:

Capacitance	Pulse rise time V/µsec			
pF/ <b>µ</b> F	max. operation			
1000	1000			
1500	600			
2200 4700	450			
6800 0.022	300			
0.033 0.047	200			
0.068 1.0	100			

for pulses equal to the rated voltage,  $\rm U_{pp}\,{=}\,390~V$ 

Test voltage: 2700 VDC, 2 sec. Reliability:

Operational life >  $300\,000$  hours Failure rate < 1 fit (0.5 x U<sub>r</sub> and 40° C)

Country	Authority	Specification	Symbol	Approval-No. 250 VAC	Approval-No. 275 VAC	
Germany	VDE	DIN EN 132400 IEC 60384-14/2	EN 132 400	89749	89749	
USA	UL	UL 1283	1.1	E 100438	E 100438	
Canada	CSA	C 22.2 No. 8	<b>(F</b> )	LR 93312-1	LR 93312-1	

## **Mounting Recommendation**

To minimize or avoid shock and/or vibration stresses to terminating wires and solder connections we recommend to fix voluminous resin-potted MP capacitors as from e.g. PCM 22.5 mm in an appropriate way since for constructional reasons they do not sit tight on the board.

## Packing

Available taped and reeled up to and including PCM 22.5 mm.

Detailed taping information and graphs at the end of the catalogue.

For further details and graphs please refer to Technical Information.

## Recommendation for Processing and Application of Through-Hole Capacitors

## **Soldering Process**

A preheating of through-hole WIMA capacitors is allowed for temperatures  $T_{max} < 100 \,^{\circ}$  C. In practice a preheating duration of t < 5 min. has been proven to be best.

### Single wave soldering

### Double wave soldring

- Cadmium

- Mercury

- etc.

- Arsenic

## WIMA Quality and Environmental Philosophy

## ISO 9001:2000 Certification

ISO 9001:2000 is an international basic standard of quality assurance systems for all branches of industry. The approval according to ISO 9001:2000 of our factories by the VDE inspectorate certifies that organisation, equipment and monitoring of quality assurance in our factories correspond to internationally recognized standards.

## WIMA WPCS

The WIMA Process Control System (WPCS) is a quality surveillance and optimization system developed by WIMA. WPCS is a major part of the quality-oriented WIMA production. Points of application of WPCS during production process:

- incoming material inspection
- metallization
- film inspection
- schoopage
- pre-healing
- lead attachment
  cast resin preparation/
- encapsulation
- 100% final inspection
- AQL check

## WIMA Environmental Policy

All WIMA capacitors, irrespective of whether through-hole devices or SMD, are made of environmentally friendly materials. Neither during manufacture nor in the product itself any toxic substances are used, e.g.

– Lead

- PCB
- CFC
- Hydrocarbon chloride
- Chromium 6+

We merely use pure, recyclable materials for packing our components, such as:

- carton
- cardboard
- adhesive tape made of paper
- polystyrene

We almost completely refrain from using packing materials such as:

- foamed polystyrene (Styropor®)
- adhesive tapes made of plastic
- metal clips

## **RoHS** Compliance

According to the RoHS Directive 2002/95/EC certain hazardous substances like e.g. lead, cadmium, mercury must not be used any longer in electronic equipment as of July 1st, 2006. For the sake of the environment WIMA has refraind from using such substances since years already.

Tape for lead-free WIMA capacitors

## ISO 14001:2005

WIMA's environmental management has been established in accordance with the guidelines of ISO 14001. The certification is under preparation and is expected to be accomplished by June 2006.
