# Description

The **Akyga® TFX** power supply **300W** is an advanced, compact power adapter dedicated to mini and media PC systems. It supports all the latest construction standards, ensuring high performance and stability.

The power supply features a **4+4-pin** connector, **MOLEX** connector, **3 x SATA** connector and universal **24-pin** motherboard connector. A guarantee of high efficiency is the **80 PLUS®** compatibility which ensures that **at least 80%** of energy provided by the power supply is received by computer's components and a maximum of 20% of energy is lost in the form of heat. High efficiency allows effective supplying and so the stable operation of the power supply affects the reliability of all components of the computer. Effective cooling is provided by efficient, silent fan of **8 cm** diameter. The power supply is ideal for small and medium-sized cases thanks to optimized **36 cm** long set of cables. Product is made of durable galvanized steel.

An important aspect is the presence of several important protectors (OVP, OCP, OPP, OTP, SCP, UVP) and **active PFC filter** that protects and prevents motherboard, processor and other parts from damage and stabilize the operation of the power supply so that it works without any unwanted interference. The TFX **AK-T1-300** power supply is a high quality product that meets the current requirements and corresponds to modern standards.
